MUHAMMED SABIR C.

Full-Stack Web Developer (Student)

muhsabir.c@gmail.com | +91 89435 39446 | github.com/Falcon-Exe | India

PROFESSIONAL SUMMARY

BSc Computer Science student seeking a full-stack internship. Experienced in building role-based dashboards, authentication flows and database-connected web applications with React, Next.js, Supabase and Firebase, and deploying them on Vercel. Uses AI-assisted tools for planning, code generation and debugging, and reviews and tests the output before shipping.

EDUCATION

BSc Computer Science (Honours) Currently pursuing

Majlis Arts and Science College, University of Calicut, India

PROJECTS

WafyFest — Event Management Dashboard (Under Development) Next.js, Supabase, Vercel

- Built role-based dashboards and authentication flows for a multi-college arts and sports fest platform.
- Structured the system around registrations, event entries, results and points tracking.
- Repository: github.com/wafyfest/dashboard

HAMARTIA 2026 — Arts Fest App React, Vite, Firebase

- Developed an admin and team-lead web app with Firebase Authentication and live Firestore data.
- Implemented event categories, schedules, results and CSV-based data workflows.
- Live: artsfestapp.web.app

MUSF — Organization Web Platform React, Vite, CSS

- Built a responsive, component-based site with a custom visual identity and clear navigation.
- Live: musf.web.app

TECHNICAL SKILLS

Frontend	React, Next.js, JavaScript, HTML5, CSS3, responsive design
Backend & Data	Supabase, Firebase Authentication, Firestore, REST API integration
Tools	Git, GitHub, Vercel, Firebase Hosting, AI-assisted development tools

CURRENTLY LEARNING

TypeScript, headless commerce (Shopify) and caching strategies for production applications.
